Modern University for the  
Humanities (MUH) Sept. 2005 to  
July 2011  
Bachelor of Economics

### Projects

#### Crime Statistics For Travelers

The goal of this project is to make the world a safer place. This application brings awareness to current safety issues in the United States and let travelers know what is safe and what is not.

**Tech Stack:** React | Mapbox | Node/Express | Styled-Components | Sqlite3

- Served as a full-stack engineer working on front and backend of the application
- Collaborated with 3 other full-stack engineers that emphasized planning, team communication, and pair-programming through problems and features
- Created fly to and detect current location functionalities with test-driven development
- Front-end Github repo: <https://github.com/Lambda-School-Labs/crime-statistics-for-travelers-fe>
- Back-end Github repo: <https://github.com/Lambda-School-Labs/crime-statistics-for-travelers-be>

#### Pic Some

This is one of my solo projects. After completing Lambda School(now Bloom Institute of Technology), I've decided to brush up on my newly learned skills and have created this app/site.

An eCommerce replica app. The user can favorite or add the desired image to the cart, where they can remove the specific item or place an order. The app is made by using ReactJS. It uses hooks, including useEffect(to fetch data), useState(for creating states), useContext(including Provider, to send states and functions across app), BrowserRouter, Switch, Route and Link(to create link/route paths/urls). Deployment was done by using Vercel service.

**Tech Stack:** React | BrowserRouter | useEffect | useState | useContext

- GitHub repo: <https://github.com/tsarg88/PicSome>
- Deployed Project: <https://picsome.vercel.app/>

#### My other works

Please check my portfolio site to see my **other** works at: <https://tsargsyan.com/>

2018 to Current

### Employment

#### Karabakh Telecom

Billing Specialist

Jan. 2017 to Jan. 2018

- Developed and supported billing related procedures, new tariff plans setup, checking and handling of the entire reporting services
